

Quapaw Cattle Company is an entity of The Quapaw Tribe.

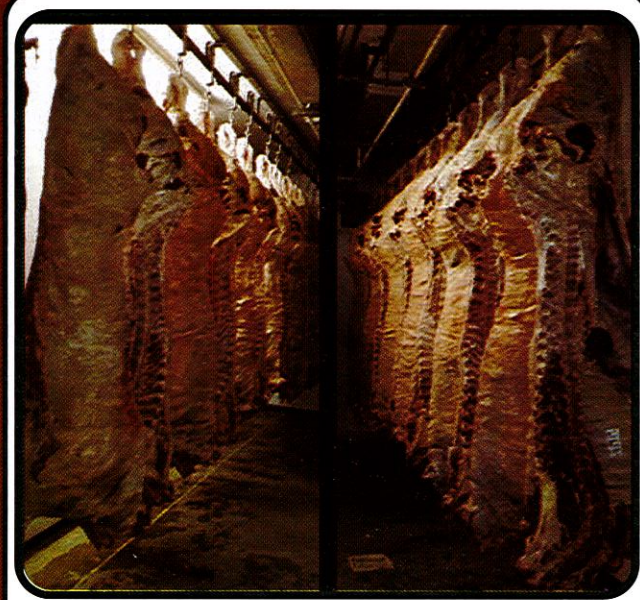

To produce the highest quality steaks, you must start with the highest quality cattle. Quapaw Cattle Company sources its cattle from the Spur Ranch in Vinita, Okla. The Spur Ranch is the oldest cattle ranch in Oklahoma and has been tracking performance and genetics in their cattle for over 20 years. These genetics continually produce the highest quality beef year after year.

Quapaw Cattle Company processes its beef at USDA-inspected facilities and USDA inspectors grade the beef.

Quapaw Cattle Company is committed to providing high quality, hormone-free beef. We use safe and humane practices in raising and handling our animals. Quapaw Cattle Company is proud to offer Choice, Choice Plus, and Prime Beef. We also raise grass fed, grain finished beef. All of our beef products are hormone free and natural with no added chemicals or colorings. Quapaw Cattle Company only processes cattle that are of an "A" maturity level.

The Quapaw Cattle Company has a special way of producing high quality beef. We go back to the time when the

quality and flavor of the beef was of the most importance. We are not giving in to the giants of the industry that believe that a mass produced, bagged and boxed product is better. We prefer to carry on some of the finest traditions in the industry, producing the highest quality product that you, the customer, demand. We take great pride in offering you Quapaw Cattle Company Beef.
